Summary

Senior Backend Engineer with 10 years of experience building enterprise and financial applications using Java and Spring Boot. Experienced in HLD, REST API design, backend development, data modelling and technical solutioning for business-critical systems. Led engineering initiatives including GitHub/CI-CD migration and automation of data-processing workflows. Strong foundation in distributed systems, microservices and event-driven architecture.

Technical Skills

Languages: Java, Go
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, Kafka, Event-Driven Architecture, Hibernate
Databases: SQL Server, PostgreSQL, Oracle DB, Redis
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins/Bamboo
Architecture: HLD, System Design, Microservices & Monolithic Architecture, NFRs (Scalability, Performance, Security)
Core CS: Multithreading, DSA
Tools: Git, Swagger, Splunk, Grafana, New Relic, GitHub Copilot

Experience

Assistant Manager Dec. 2021 – Present
Macquarie Global *Gurugram*

- Designed HLD and built end-to-end backend for Country Risk Rating, including formula-driven scoring, multi-stage approval workflow, email notifications and approval/rejection persistence
- Designed and built Counterparty Notes module with REST APIs, attachment handling and full CRUD operations
- Built SQL-backed Customer data retrieval for a new product, aggregating multiple joins for customer overview
- Developed MBE Limits discretion calculator to determine approval tiers and identify valid approved workbooks through multi-step limit, approver and five-year history validation
- Built React.js credit history modal displaying five years of customer credit history through backend APIs
- Streamlined data pipeline (Trino → CSV → SQL Server), eliminating manual sourcing and stale-data reprocessing
- Led GitHub migration, established development/PR practices, mentored developers and conducted code reviews
- Stack: Java, Spring Boot, REST APIs, SQL Server, AWS, Docker, Splunk, GitHub Copilot, React.js

Consultant Sep. 2019 – Dec. 2021
Genpact *Noida*

- Enhanced enterprise Java applications, improving reliability and performance across distributed environments
- Owned production incident response for outages, job failures, and data defects
- Built a role-management screen with stored-procedure-backed persistence, saving 500+ person-hours annually
- Stack: Java, Spring, Oracle DB, Docker, AWS, Jenkins

Senior Software Engineer Oct. 2018 – Aug. 2019
Diverse Lynx (TCS) *Noida*

- Enhanced web applications using PHP, Zend, MySQL; migrated frontend from AngularJS to Vue.js

Software Developer Jul. 2018 – Oct. 2018
Amdocs *Gurugram*

- Resolved production defects in telecom order management using Java and Oracle DB

Software Engineer Jul. 2016 – Jun. 2018
Narnix Technolabs Pvt. Ltd. *Delhi*

- Built IoT-based home monitoring system using Java 8, Spring Boot, and REST APIs (oneM2M standard)

Projects

Event-Driven Microservices Platform | *Java, Spring Boot, Kafka*

- Designed event-driven microservices with Kafka; debugged consumer offset/retry behavior

Go Backend Platform — Wallet & Transfers | *Go, PostgreSQL, Redis*

- Built atomic wallet transfers with row-level locking and a Redis-backed async worker queue

Education

Jaypee University of Engineering & Technology Guna, MP
Bachelor of Technology in Computer Science & Engineering *Aug 2012 – Jun 2016*
